

21st September 2018

Dear Parents

BIOLOGY FIELDWORK, TUESDAY 25th SEPTEMBER 2018

As part of the biology curriculum I have arranged to take Lower 4 to the Harewood estate on Tuesday 25th September to carry out some fieldwork. We will be taking some samples of invertebrates from a shallow beck, no more than 6 inches deep and sampling the surrounding soil. This fieldwork will take place during normal lessons and there is no charge.

Your daughter should come to school in her PE kit and bring her uniform to change into on our return. She will also need a waterproof, wellington boots and a bottle of water. The school minibus will take us as close as possible close to the site of interest but there will be a 20 minute walk over uneven terrain through woodland with the same arrangement for the return journey. We shall leave school at 9.00 am and return at approximately 11.15 am.

Yours sincerely,

Mr D Fairfield
