

High School & Sixth Form

Lower 5 Photography

This half term the Lower 5 photography pupils have been exploring the work of Lynette Jackson and developing their Photoshop skills. They began by studying the photographer's work, analysing her use of collage and then replicating her style, using their own photographs of architecture. The pupils have learnt complicated Photoshop techniques to create their contemporary designs and are now exploring physical collage, using mixed media. Their folders are looking excellent and reflect the hard work and focus that they are applying to their photography coursework.
