Happy Pi Day to you!

Q: What did Pi say when someone asked if they could explain why it was Pi Day again?

A: I don't want to repeat myself! 😊

On the 14th March we celebrated pi day in the maths department. Sadly, this didn't involve eating pie but instead focused on circles! Some groups used a pair of compasses to create circle patterns, using circles with different radii and their arcs.

Lower 4 discovered pi by measuring the circumference of a circle with string and dividing the circumference by the diameter. The more accurate they were in their measurements the close they were able to calculate the value of pi.

And finally, why should you never start talking to Pi at a party? Because it just goes on forever...!
