

Shapes and patterns in Transition

This half term, Transition have been learning all about 2D and 3D shapes. We have learnt to identify and describe lots of shapes from circles to rectangles, spheres and cuboids.

This week, we have focussed on using these shapes to create repeating patterns.

The children have been fantastic at looking for patterns and finishing incomplete patterns.

They have even used shapes to make their own patterns using both paint and loose parts - well done Transition!

Miss Beth Hayter and Miss Alice Bryant
