

Upper 2 delve into the world of paranormal phenomena

An enthusiastic Upper 2 delved into the world of paranormal phenomena at the Otley science fair this week. Their curiosity led them to explore the myths surrounding ghost hunting, aiming to distinguish fact from fiction through scientific investigations.

Armed with critical thinking and research skills, the students engaged with experts who debunked common misconceptions about ghosts. The young investigators learned about the scientific methods employed to scrutinize paranormal claims, showcasing how evidence-based reasoning trumps superstition.

The trip provided an invaluable opportunity for these budding scientists from Gateways to challenge preconceptions, fostering a deeper appreciation for the scientific method in distinguishing reality from the supernatural. The Upper 2 students returned to Gateways School armed with newfound knowledge, ready to apply their scientific prowess to future enquiries.

Mr Mike Arnold and Mr Matt Chandler
