

Upper 3 design African masks

This term Upper 3 have been creating some African mask designs inspired by the artist Kenal Louis. Pupils have been shown how to use grids and symmetry to create accurate replicas of the artist's African inspired line art and have used his work to inspire their own designs.

The pupils had fun developing a variety of ideas using flash cards to determine random outcomes, and to make it more of a challenge they had to complete this task against a timer! This activity tested their pace and drawing skills and was a fantastic way of creating a variety of designs. Pupils will now use these designs to finalise a 3D outcome.
