

## Empowering students and teachers in Mathematics

I was pleased to hear the recognition that Dr Jamie Frost and teachers around the globe received from Boris Johnson.

Who is Dr Jamie Frost? He is a mathematics teacher who started life trading algorithms for an investment bank. He tried teaching and was hooked and dedicated his working life to empowering young students to become better and confident mathematicians.

DrFrostMaths provides an online learning platform, teaching resources, videos and a bank of exam questions all for free. Lower 5 Set 1 and Lower 6 have been making full use of this excellent free resource. The pupils all agree with me that DrFrostMaths gives them the opportunity to improve their independent learning skills whilst getting the much needed examination question practice that is crucial to being successful in Mathematics. I even had to teach myself how to use the website developing my own independent learning skills.
