

## Upper 4 use Sway

Upper 4 were set the challenge of creating a Sway presentation on a topic they found interesting. The themes included history, designer brands, netball, food, travel and Tesco's!

Sway is part of Office 365 and allows you to combine text, images and video into presentations which can then be shared. It makes a welcome change to Power Point presentations or posters and has given Upper 4 the opportunity to think about using alternative presentation methods.
