

## Upper 6 gameshow Geography!

As the Upper 6 begin to say their goodbyes to us, it's been lovely to have the opportunity to have a lot of fun and laughter with our pupils, leaving them with some final fond memories of their time at Gateways.

For the Upper 6 geographers, this took the form of gameshow geography. Each person was allocated a different area of the specification with the brief to design a quiz consisting of a vocabulary round, a picture round and a general knowledge round. Working in teams, we then completed the games and generated a leader board.

The class were very inventive, and we had a full range of styles to suit every learning need from dingbats to name that place, anagrams to Kahoot and so much more in between.

To top it off, we then had a fun geography trivia quiz with 9 different categories to test their knowledge of all things geographical.

Whilst this gameshow might not have had a £1 million prize, each member received a personalised certificate based on the inside jokes that we've developed over the last two years and their reactions to these were quite simply priceless!

Our Upper 6 have been an absolutely superb year group and will truly be missed next year.
