

Upper 4 explore physical theatre

Upper 4 have started their final group project of the year. They are exploring the genre of physical theatre and how to create chorus.

Physical theatre is a form of theatre which emphasises the use of physical movement, often in an exaggerated way for expression. There is a huge emphasis on movement rather than dialogue. The pupils have watched some clips created by the National Theatre and are now starting to create their own pieces. The images above show a sequences of 'counts' where each number represents a different movement.
