

Upper 3 learn all things chemistry

Flammable

Harmful or irritant

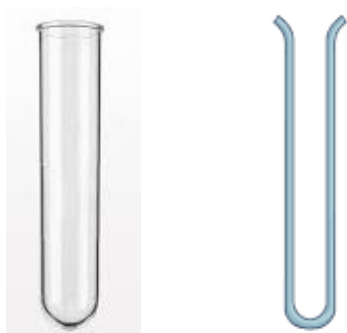

Corrosive

Upper 3 are learning all the essential things they need to know when studying chemistry. They started by looking at hazard labels on chemicals and found that many products at home also have these hazards.

They have also learnt the names of scientific apparatus and how to draw them in 2-D, for example a test tube is drawn like this.

The exciting bunsen burner will be used next time.

Mrs Lesley Wood
