

UKMT Intermediate Maths Challenge congratulations

Each year the keenest and most able mathematicians across the country compete in the UKMT Maths Challenges and a number of our students recently took part in the Intermediate Challenge, which is aimed at students in Upper 4, Lower 5 and Upper 5. Due to the cohort who take the challenge it is extremely difficult to achieve a certificate, so we are delighted this year to announce that fifteen of our students were awarded this prize. The following all achieved bronze certificates: Amelia Butler, Alex Gibson, Lydia Marsh, Chloe Brogan, Rey Dong, Isabel Dyer, Eleanor Johnson, Sophie Brearley, Millie Day, Ella Neale and Maya Stephens. Silver certificates were awarded to Jemima Land and Cerys Stevens. And finally, gold certificates were awarded to Jamie Cooper and Lucy Sherman, alongside Joint Best in School. I can also report that Jemima, Jamie and Lucy all achieved such high scores within their year groups that they have been selected by the UKMT to go through to an international competition which will be held later in March.

Congratulations to all the students who entered the challenge and particularly to those who have been awarded the highly prized certificates.

Mrs Jennie Knight
