

Lower 4 write the city

Lower 4 are learning to write to describe, using a picture as inspiration. Based on the picture above, the pupils wrote some compelling and imaginative descriptions of the following: a bored waitress gazing longingly at the throng of people outside; a lost child who catches a glimpse of her parents through the crowd; and a young girl whose parents are convinced that there is a deadly virus spreading through the city below, and who is forced to sit staring wistfully out of her window, with only the sun for company. The latter was a particularly innovative approach by Maisie.
