

## Upper 4 pupils compete to build the tallest lighthouse

As part of our celebrations for National Science Week, Upper 4 took part in a competition in their science lessons with the aim of building a lighthouse using limited paper, elastic bands and sellotape. As an extra challenge they were able to gain a bonus of 15cm to the height of their tower if they could attach a bulb near the top of their structure and make it flash using only a bulb, cell, tin foil and a peg.
