

Lower 2 go fanatic about fractions

This week in Lower 2 we did lots of work on consolidating fractions, we played many wonderful games including the one pictured above. Pupils had to convert fractions from a mix number to an improper fraction or the other way around to earn house points. The person with the most points at the end won some house points.

This is just one way that we try to make maths fun and active at Gateways. Look out for more ideas that you could try at home over the next few weeks.

Mr Charlie Grasby and Mr Mike Arnold
