

Lower 4 debate the similarities and differences between religions

Over the last two years in religious studies, the current Lower 4 have studied the key beliefs and practices of the world's six main religions as well as some other religions with smaller followings.

In Upper 3 they study Judaism, Christianity and Islam, and then in Lower 4 they study Hinduism, Buddhism and Sikhism. As they prepared for their summer exam, Lower 4 have been using lesson time to revise these religions by debating the statement: *'There are more important similarities than differences in the world's religions.'*

Mrs Hamlyn has been ably assisted by one of our A Level Philosophy students, Emily who has been helping the Lower 4 construct their arguments and point out the flaws in their opponents. This has been a really valuable exercise for Lower 4 which will no doubt help them succeed in their upcoming exam.

Mr Daniel Reeves
