

International Day – Iceland

International day took the children in Reception class north westerly up to Iceland. The day started with an international parade in the PAC with celebrations from around the world.

We watched a video about Iceland and learnt to say “hello” and “goodbye”. Afterwards the children started the day by making ice cream! Icelanders have always loved their ice cream and eat it no matter the outside temperature.

Next we made puffins and whales which are native to the Icelandic seas and coastline.

In the afternoon the children enjoyed a relaxing foot spa whilst eating ice cream, they carried out a Northern Light experiment and made some pictures using chalk to recreate Aurora Borealis. What a busy day!
