

Photography trip

This term the Lower 5 photography pupils are exploring the theme 'Architecture'. After learning about depth of field, aperture and key composition techniques, we went on a trip into Leeds city centre to do a shoot. The students focused on capturing repeated patterns within the buildings as well as texture, reflections and symmetry. The class also had the opportunity to use a professional photography space and speak with local artists. When we returned to school, the students used their Photoshop skills to finalise their images, and create the most stunning outcomes.
