

Lower 2 design a zoo!

In Lower 2 we have been working hard in English to create lots of different text types all about animals. This week, we have been working in our classes to create our very own zoo! The children have been researching different elements of a zoo, including the animals and enclosures, food and drink and animal experiences. Lower 2 have loved being creative and have produced some excellent brochures all about our zoos. They have used many different language techniques and features throughout their brochure to ensure that it is a successful information text. Personally, I would love to visit all of them!
