

Lower 3 get their motor skills running

Lower 3 enjoyed a test of their fine motor and teamwork skills as they vied to build the tallest structure they could using only dry spaghetti and marshmallows.

The children got to work quickly and efficiently to create their sweet and starchy towers and showed an impressive degree of cooperation, problem-solving and fine motor skills.

Perhaps amongst them are the architects of the cities of tomorrow. If so, we are in safe hands, provided they have access to building materials less likely to either expand or dissolve in the rain.

Miss Jade Preston and Mr David Woodfine
