

Lower 3 develop sewing machine skills

Having focused on developing their hand sewing skills last year in Upper 2, Lower 3 have spent all of their textiles lessons this half term learning how to control the speed of the machine, change directions and drive along pre-drawn straight and curved routes. Now that they have control over their sewing machine driving, they have moved on to learning how to thread up the machine and sew on fabric. They are excited to begin making their drawstring bags later this term.
