

Lower 4 art – foil balloons

Lower 4 have been learning the foundational skills of drawing from observation by using the gridding up method. This has enabled them to draw accurately, to scale and in proportion. They have then used 2B and 4B pencils to shade their foil balloon, looking for shadows and highlights to create a realistic effect. They have worked so hard at observing the image in detail and have done an excellent job. Well done Lower 4!
