

Goodbye Hegarty, hello Sparx!

We are excited to inform you that we have recently made the decision to replace Hegarty Maths with Sparx Maths. The transition is led by Colin Hegarty himself, the founder of Hegarty Maths, who now serves as the Chief Executive of Sparx. This transition is aimed at providing our pupils with a significantly enhanced learning experience, thanks to Sparx's superior and more comprehensive content.

We recognize that some pupils have found Hegarty Maths challenging to access, and it has not always sufficiently challenged those who needed extra stimulation. Sparx, however, employs innovative AI systems and algorithms that continually assess each pupil's ability. This dynamic assessment process enables Sparx to generate personalised homework assignments that strike the perfect balance between being challenging and achievable. This approach not only fosters engagement but also boosts pupils' confidence and, most importantly, their learning outcomes.

Sparx goes a step further by creating interleaved homework assignments, which include topics from recent lessons as well as concepts from earlier in the curriculum. This deliberate practice promotes long-term retention of knowledge and helps solidify concepts in our pupils' memories.

This current academic year, our pupils have answered an impressive 17, 446 questions correctly and collectively spent 340 hours engaging in personalised learning through Sparx!
