

Using AI in languages

Spanish

¡Hola! Soy Isaac, un canguro alienígena. |1| gusta comer zanahorias |2| y saltar por planetas. Me encanta bailar al ritmo |3| la música |4| Pero en el espacio, itodo flota! |5| siempre hay meteoritos . Me |6| descansar en mi nave y ver las estrellas. |7| aventurero y quiero explorar |8| ¡Vamos a saltar |9| reír |10| parar!

English [Reveal Text](#)

Hello! I'm Isaac, an alien kangaroo. I like to eat space carrots and jump across planets. I love to dance to the rhythm of galactic music. But in space, everything floats! Also there are always meteorites . I like to rest in my spaceship and watch the stars. I'm an adventurer and I want to explore with you. Let's jump and laugh non-stop!

Spanish [Hide/Reveal](#)

Me sin Soy gusta espaciales de y
También galáctica contigo

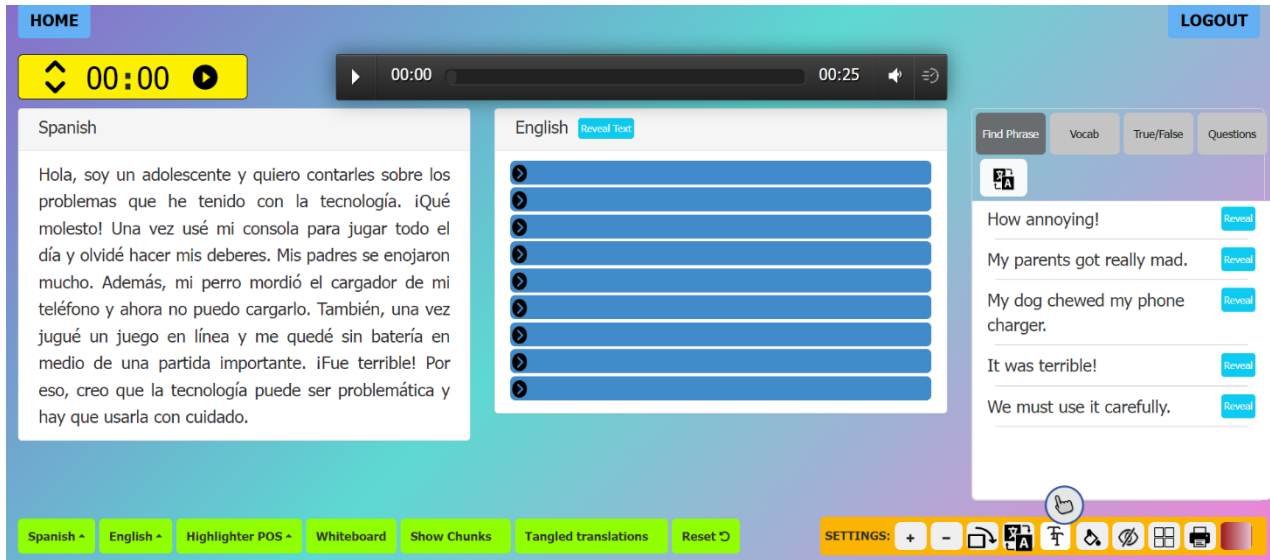

As with any new technology, it is important to find the most helpful and effective way to use it in order to help pupils in their learning. I was delighted to find out about a webinar launching the new website LingoTeach.ai and joined it with teachers from across the globe. I was so impressed, I subscribed straight away and started using it with my classes the very next day!

The creators of the website have teamed up with ChatGPT to produce an easy means of writing texts for specific languages and ages which include vocabulary and grammar structures set by the teacher. These texts are then turned into audio and language games for the pupils. What I particularly like are the options to make the text funny, creative, more or less complex, shorter or longer.

In class, we created some texts together which have a parallel English translation and played the games. Our particular favourite was the alien kangaroo in space! Lots of extra vocabulary is generated naturally and it encourages pupils to work out new meanings from the context, which is an important reading skill. We are therefore showing pupils how to use AI positively to practise language skills in a fun way and not use it to do the work for them. We always know if the language is something produced by the pupil or a computer! The creators are working on a pupil platform using AI to help with language learning, which I hope will involve speaking as well. Once it is available, I will let everyone know.

Spanish

Hola, soy un adolescente y quiero contarles sobre los problemas que he tenido con la tecnología. ¡Qué molesto! Una vez usé mi consola para jugar todo el día y olvidé hacer mis deberes. Mis padres se enojaron mucho. Además, mi perro mordió el cargador de mi teléfono y ahora no puedo cargarlo. También, una vez jugué un juego en línea y me quedé sin batería en medio de una partida importante. ¡Fue terrible! Por eso, creo que la tecnología puede ser problemática y hay que usarla con cuidado.

Tangled Translation (Target-Native)

¡Hola! Soy Pedro, tengo 13 años and I like ser adolescente. I love escuchar música and dancing en el supermercado. I also love hacer coreografías con mis amigos. I like colourful butterflies, pero no me gustan cockroaches. Me encanta comer paella con arroz amarillo and seafood. ¡Ser adolescente is great, siempre hay fun things to discover!

Me chifla y me gusta Me gustan las mariposas de colores, y bailar cosas divertidas por descubrir! y mariscos. También me mola es genial, las cucarachas.

Hi, I'm a teenager and I want to tell you about the problems I've had with technology. It's so annoying! Once, I used my console to play all day and forgot to do my homework. My parents got really mad. Also, my dog chewed on my phone charger and now I can't charge it. And, one time I was playing an online game and ran out of battery in the middle of an important match. It was terrible! That's why I think technology can be problematic and we have to use it carefully.
