

Amazing addition in Lower 1

This week our Lower 1 mathematicians have been very busy continuing with their addition and subtraction topic. The children used ten frames to support them when adding two numbers together and have even started adding three numbers together by spotting number bonds to 10.

We used different coloured counters and cubes to represent the numbers and added them together successfully. All the adults in Lower 1 have been so impressed with the children's confidence when using the mathematical equipment!

The children have also started to write their calculations down in their maths books, using the squared paper, as you can see from the photos above, they are doing brilliantly - well done Lower 1!
