

## Super shapes in Lower 1

Lower 1 children have been very busy bringing our current 'shape' topic to life. The children really enjoyed using different resources to create a range of 2D shapes. They have become experts at counting the sides and vertices of different 2D shapes. Lower 1 also really impressed us with their understanding of lines of symmetry and confidently created their own symmetrical butterflies. Next week we will move on to find out more about 3D shapes and their properties.

Well done to our brilliant Lower 1 mathematicians!

Miss Beth Adamson and Miss Charlotte James
