

Human and physical geography

This half term, Transition are learning about geography in their humanities lessons.

So far, we have learnt about maps and designed our own maps, using the correct map symbols to represent the different places.

This week, the children have learnt about the difference between human and physical features in the environment. We have learnt that human features are made by people and that physical features are natural and would be in the environment whether humans were there or not!

They worked in teams to sort different features into the correct category. It was lovely for both classes to come together for a lesson and all the children did extremely well!

Maybe you could play a 'human or physical feature' game the next time you have a long car journey? I'm sure the children will impress you with their learning!

Miss Beth Hayter and Mrs Heather Hallam
