

Upper 4 learn about Paris

As part of their French studies, Upper 4 were asked to research the capital city Paris. They could focus on any aspect of the city and its culture– food, famous sights, population size or history. Each group has been taking turns in presenting their research to the rest of the class and the quality of the presentations has been excellent. The pupils have also been testing the rest of the class with questions such as the height of the Eiffel Tower (330 metres) and the length of the Seine (483 miles). Above we have Zac and Zak telling us about the Louvre and Sadie and Isobel beginning their presentation on Paris.
