

Lower 5 drama - devising from a stimulus

Devising is a group collaboration in response to a stimulus leading to the creation of an original performance. Devising in drama demands inventiveness, an understanding of the rules of structuring a piece of theatre and a readiness to collaborate with others.

Lower 5 drama classes have started exploring their initial dramatic ideas based on a stimulus. These ideas will form the base for a devised performance. 40% of the GCSE grade is based on this performance and already I have seen some fantastic ideas coming forward.

This year in addition to the acting pathway we have three pupils who have opted to study the technical option; lighting and costume. I am really looking forward to the next few months as these performances start to take shape.
