

Fossils in Upper 1

This half term, Upper 1 have been learning about fossils! A subject that has definitely captured their imaginations! We have learnt all about how fossils form in the ground over thousands or even millions of years and have studied real fossils samples carefully and thought about what creatures they could have once been. We even had a go at creating our own fossils (albeit MUCH more quickly!).

Our upcoming trip to Stump Cross Caverns is going to be a wonderful way to finish off our topic!

Miss Beth Hayter and Mrs Alex Arundale
