

Upper 2's fabric monster mash

Upper 2 have been busy finishing off their fabric monsters. To start off, the children researched and evaluated existing products. They then created mood boards based on the demographic of their target market. The children sketched their designs and chose their favourite.

Next, it was time to create their templates on card and cut them out accurately before working on creating their final design. They cut out their panels accurately and sewed them together using various sewing techniques.

All in all, the children produced some fantastic squishy monsters and they should be very proud of what they have created – well done Upper 2!
