

Trash to Treasure competition

The Rosetta Stone, Tutankhamun's death mask, the Sutton Hoo helmet, Timmy Mallet's mallet. All priceless historical treasures that reside behind toughened glass in the world's best museums, protected by lasers, alarms and gently snoozing docents.

Well, no longer! Now they are here in Youngers, free to view, filling every surface, fascinating and delighting all who behold them.

The standard of entries in the inaugural Trash to Treasure competition was outstanding, so much so that an extra tier of prizes had to be introduced in order to better (but alas never entirely) reflect how impressed we were with everyone's efforts.

Effort, ingenuity, care and skill shone from every piece and it was a genuinely impossible job choosing the prize winners. Regardless of whether you are listed below, you should be proud of your efforts.

We certainly are.

The Humanities Team
