

Upper 2 C's assembly

Upper 2 C delighted their audience with an informative assembly about climate change. They explained, in detail, about global warming and how it is affecting our planet. They even shared some ideas about how we can help save the Earth.

They used a variety of creative methods to deliver their message; plays were acted out, interesting facts were shared, and original poems and songs were created – all focused on the theme of caring for our environment. It was like a mix of a classroom lesson and a great show.

Upper 2 C made sure we all understood why looking after the planet is so important - a huge well done to them for making learning about climate change so engaging.

Mr Mike Arnold and Mr Matt Chandler
