

## Science week in Transition

This week is science week and this year we wanted to show children how fun and interactive science can be – using bubbles!

We didn't want to just use normal bubbles, though (that would have been boring!) instead we made ENORMOUS bubbles which were big enough to stand in and the children had a fantastic time being captured inside! Then, we tried blowing the biggest bubbles possible using giant bubble wands. The children certainly had plenty of bubble-tastic fun!

Miss Beth Hayter and Mrs Heather Hallam
