

Upper 2's educational visit to Eureka!

The week, Upper 2 enjoyed a fantastic day out to Eureka! The National Children's Museum. The pupils were treated to a science show called 'Chew the Poo' where we explored the journey of a sandwich from mouth to the toilet! We learnt about the different process involved in digesting our food and how to have healthy stools.

We then moved on to the Living & Working Together gallery, where pupils were able to explore a miniature M & S, bank and post office and looked into eco-friendly transportation. After this, pupils explored the All About Me gallery. In this gallery, children were able to measure their step length, arm-span, height and weight as well as investigating the mouth, teeth and x-rays. Our final stop was at the SoundSpace gallery, in which children explored different music from around the world, distorting voices, creating images and controlling lights.

The Upper 2 pupils had a great experience and thoroughly enjoyed the trip.
