

## Upper 4 geographers complete Europe challenges

Upper 4 are currently learning about Europe in their geography lessons which has seen them completing a number of challenges to test their knowledge.

Working in groups, pupils began by solving puzzles about the countries of Europe in an escape room-style race against time to prevent a radioactive substance getting into the hands of a rogue group called 'The Syndicate'.

Classes then competed against each other to see who could name the countries of Europe in the fastest possible time. Our individual winner was Ruby in U4Y who successfully identified all countries on a map in just 57 seconds!

Pupils then got the chance to work in pairs to learn the capitals of Europe by completing games such as dominoes, dingbats, blockbusters, triominoes and what am I?

There was some impressive knowledge shown, but it was also lovely to see skills such as teamwork being demonstrated as pupils supported each other.
