

Textiles – suitcase souvenir

Martha in Upper 5 has created this beautiful mixed media, suitcase souvenir in textiles, based on her travels. She has used photoshop to create her own digital collages which have been heat transferred onto fabric and sewn into. She has used free machine stitching to draw the food she ate on those holidays, the sights she saw and created her own travel tags for each destination.

The suitcase holds purses she has made for the currency from each place, photos she has taken and postcards she has collected throughout her journeys. The level of detail that has gone into creating each panel and piece, creates a nostalgic, personal and meaningful response. Exceptional work Martha!
