

Computing in Lower 1

In this week's computing lessons, we introduced the idea of Pointillism. The children looked carefully at pieces artwork by French painter Georges Seurat. The children noticed that Georges' artwork is made up of hundreds of small, coloured dots which gradually build up to create a piece of artwork.

The children were tasked with the difficult job of creating their very own pointillism piece of artwork using Microsoft Paint and a beautiful red apple as inspiration. The children's pieces of work were fantastic and we were so impressed with the patience and perseverance they demonstrated in the lesson too!
