

National Numeracy day

Today we celebrated National Numeracy Day in the Prep School, joining over 9,000 organisations and thousands of schools to champion numeracy. This is a national campaign that takes place every May, encouraging adults and children to build their confidence and skills with maths and numbers. Their mission is to empower children and adults in the UK to feel confident with everyday maths so they can fulfil their potential at work, home, and school.

Supporting this mission, we did lots of fun, hands-on activities and games that showcased just some of the things we do to make learning so enjoyable in maths.

Please have a look at the site below for free resources for children and adults.
