

## Lower 6 get motivated

Maslow's hierarchy of needs

Does money motivate? That is the question we have been thinking about lately in business lessons. Lower 6 have been studying different motivational theories. Each student gave a short presentation summarising a particular theorist. We enjoyed listening to the information about what leaders might do to motivate their employees. We looked at Maslow, Taylor, Herzberg, Mayo and McGregor. Each student discussed the criticisms of the different theories. Most of us came to the conclusion that money is not the only motivator; for some of us it was very important, but others saw it as not something that would motivate them all the time.
