

Where is Spanish spoken around the world?

Upper 3M Spanish have been working on their Spanish speaking country presentations. They were each given a Spanish speaking country to research and they had a list of key points to include such as finding out about the capital city, discovering which other languages are spoken there, researching which important events have happened there throughout history.

The pupils produced really informative presentations which were packed full of interesting facts and included lots of clear maps and pictures of the area. During the presentations, we all learnt lots of new information such as the different currencies used in each country and the meaning behind each country's flag.

I was very impressed with how confidently pupils presented the information to the rest of the group. Well done Upper 3M.
