

Code breaking

Upper 3 have been busy doing some code breaking activities in class this week. They decoded and deciphered a series of puzzles in order to solve the maths themed murder mystery. Pupils became familiar with Caesar Ciphers, Pigpen ciphers, Polybius Squares, Atbash ciphers and Morse code. Some pupils even got onto using Morse Code with a Caesar shift thrown in for good measure. Well done to those pupils who worked out that it was Mr Scotland, in room 24, with the chair!
