

Upper 3 pupils navigate their way to success with OS Maps

Over the last half term, Upper 3 pupils have been improving their map reading skills with an Ordnance Survey (OS) map covering Leeds, Harrogate, and Wetherby. The focus has been on understanding and applying four and six-figure grid references, as well as interpreting various OS map symbols.

Working in pairs, the pupils showed remarkable engagement and enthusiasm as they navigated through the tasks. This hands-on approach not only extended their geographical knowledge, but also fostered teamwork and critical thinking.

Here you can see pupils from Upper 3Y working together in their pairs.
