

## Gladys and Marjorie come to see Lower 1!

This week, Lower 1 have been delving further into their new science topic 'Animals and their needs for survival'. It was a brilliant opportunity to create our own informative books explaining how to look after our furry friends, Gladys and Marjorie. We discussed that rabbits are part of the mammal group and that they (like us) have four main things they need to survive; food, water, shelter and air. If they were wild animals they would be able to look after themselves however, because they are our pets we need to ensure that we always provide these important things for them.

We are now looking forward to finding out more about what amphibian animals need to survive! Keep up the super work Lower 1!
