

## Mood boards for inspiration

Upper 2 have been busy unleashing their creativity as they dive into an exciting new project: designing their very own fabric monsters. The pupils started by making mood boards to explore ideas for their monsters, gathering pictures from the internet of different colours, patterns and textures to inspire their designs. The room was filled with enthusiasm as they shared their ideas with one another and carefully curated their mood boards. It has been a fantastic way for Upper 2 to express their creativity and collaborate with their classmates.
