

## Debating the pros and cons of technology in Spanish

This week GCSE Spanish groups have been learning how to discuss the pros and cons of technology in Spanish. This is clearly a controversial issue and pupils had strong opinions about the subject. We prepared for a class debate by learning relevant vocabulary and phrases using the Quizlet app (a positive aspect of technology), then sorting out cards with Spanish phrases into advantages and disadvantages, before finally preparing arguments in teams. The debate then began with everyone taking part, using their arguments and also adding more rebuttals spontaneously. It was good fun and I was very impressed with pupils' pronunciation, communication skills and their ability to think on their feet – all in Spanish!
