

Upper 2 – to infinity and beyond!

Our Upper 2 pupils embarked on an extraordinary journey through the cosmos when the Wonderdome mobile planetarium visited Gateways last week. As pupils stepped into the magnificent inflatable dome, they were instantly transported into the depths of our solar system and beyond.

Expert astronomer Matt guided our young space explorers through stunning celestial displays, sharing fascinating insights about planets, stars, and galaxies. The immersive experience left pupils wide-eyed with wonder as they gazed at spectacular projections surrounding them on all sides.

"It was like actually floating through space!" exclaimed one excited pupil. This unforgettable experience brought their astronomy studies to life in a truly magical way.

Mr Mike Arnold and Mr Matt Chandler
