

## Upper 4 get a taste of India!

Earlier this term, Upper 4 learned about the geography of India, and as a fun end-of-term treat, they got hands-on in the kitchen. The pupils made their own vegetarian samosas, practising the tricky art of folding them neatly into triangles – and they did a fantastic job!

Instead of frying, they experimented with different glazes like egg, milk and oil before baking their samosas to perfection. It was a great way to explore Indian culture while picking up some new cooking skills. I hope some of them made it home for you to try!
