

Lower 1's exciting start to money in maths

This week in our maths lessons, Lower 1 have been busy learning all about money. The children have been identifying the value of different denominations of coins and notes, both in pounds and pence. It has been wonderful to see how familiar and confident they are becoming when working with money.

Over the coming weeks, we will extend this learning further by practising how to pay for items and calculate change. The children's enthusiasm and progress have been fantastic so far—what a superb start to our new maths topic! Well done, Lower 1!
