

Lower 3 explore London landmarks

Lower 3 are learning about London this term in preparation for their visit to the capital later this year.

The children began their topic by identifying the major London landmarks and then working in pairs to research one of their choosing using topic books, maps and the internet.

They then produced some fantastic and informative posters about their chosen landmark before going on to try their hand at fashioning a replica from Lego.

It was great to see the children using the skills they have been developing throughout their time in the Prep School and working with a partner towards a common goal.
